quick start

c. You will be presented with a list of Sirocco devices on your network. If there is only one device present, select it and click OK. If there is more than one device in the list and you're not sure which to pick, check the sticker on the back of your device, and select the list entry that has the corresponding Hardware ID.

d. The next step will give you the option of renaming your Sirocco. This gives you a chance to personalize it, and identify it if you have more than one Sirocco on your network.

e. After scanning for wireless networks, the wizard will present you with a list of available networks. Select your network and click Next. If your network doesn't appear, try clicking the Refresh button.

f. If your network uses a security key, you will be prompted for it in Step 3. Enter your key and confirm it, then click Next.

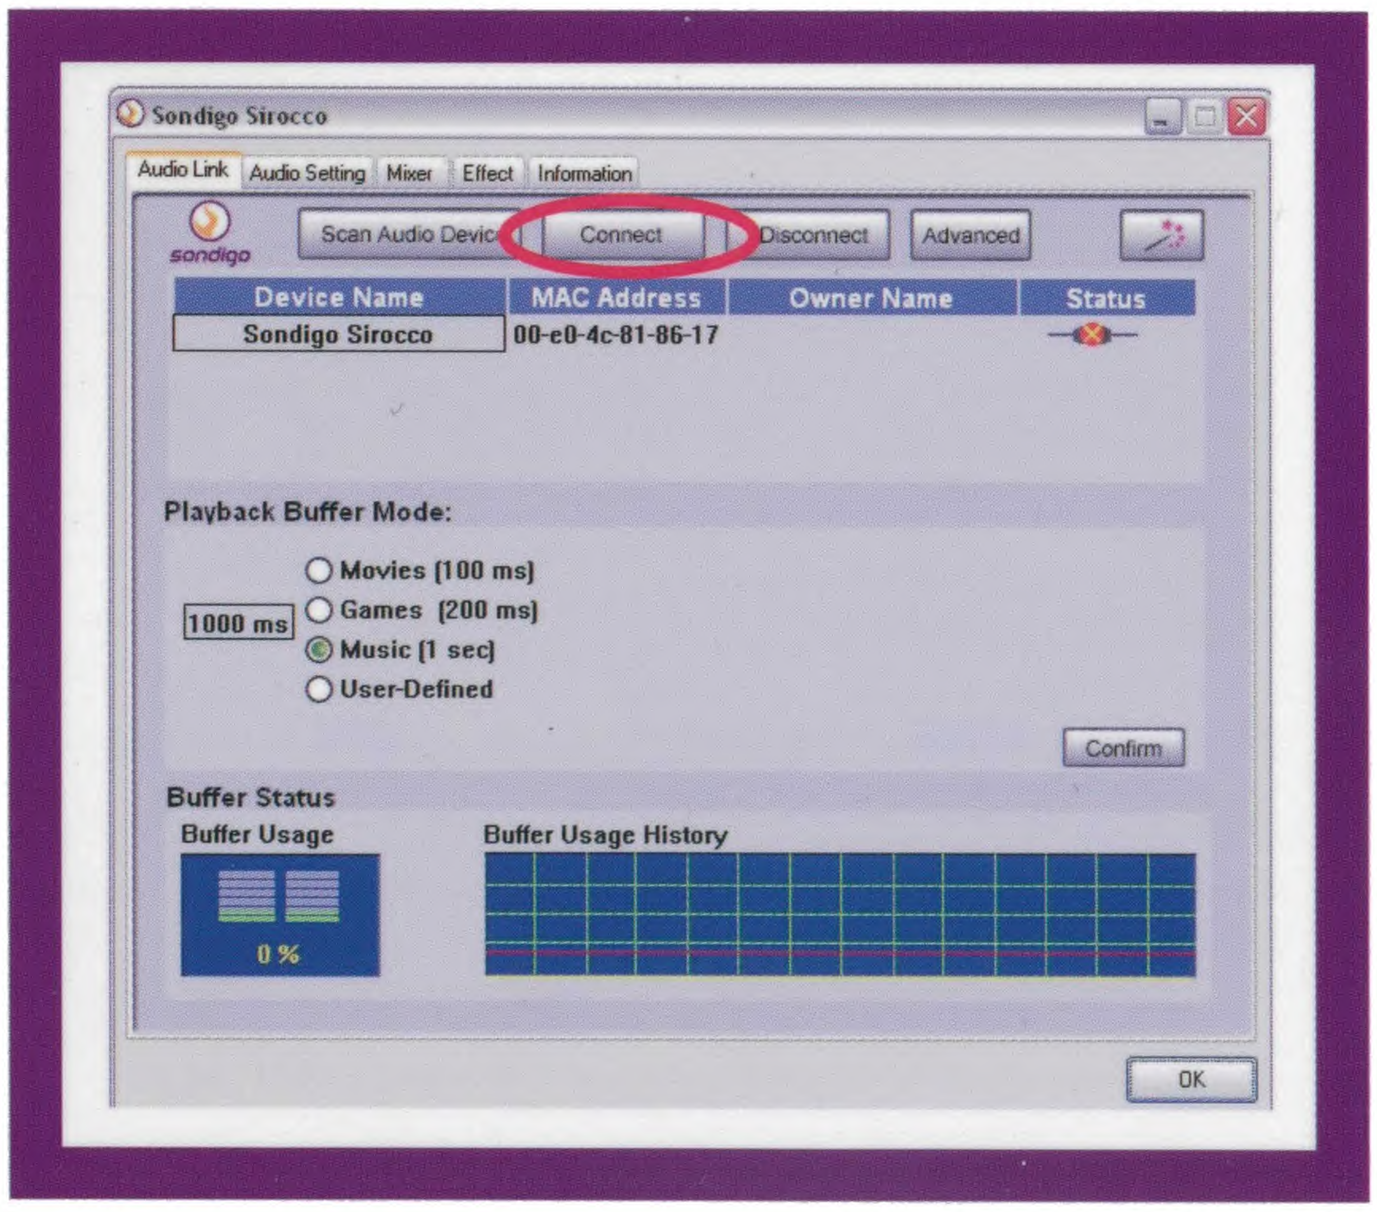

g. Click Finish to end the Setup Wizard. It will take a few seconds to save your changes back to your Sirocco device.

3 Connect your speakers and go wireless!

a. If you're on a wireless network, you can now unplug the Ethernet and power cables, and move Sirocco to your preferred listening environment. Reconnect Sirocco to wal power with the AC adapter.

b. Connect your Sirocco receiver to your stereo speakers or headphones to the green Headphone/Front analog jack, or connect to your AV receiver with the optical digital connector.

c. On your computer, the Sirocco Control Panel will appear after you finish the Setup Wizard. Select your Sirocco device and click **Connect**. Now open up your audio programs and wirelessly stream your audo to Sirocco!
